LORENZO LODIGIANI

Buenos Aires, Argentina · (+54) 1134814389 · lodigianilorenzo3@gmail.com
Portfolio: warrer33.github.io/Sheina_portfolio

PROFESSIONAL SUMMARY

Game developer with a strong artistic and narrative focus. Comprehensive experience in character creation, worldbuilding, scriptwriting, and interactive storytelling, combined with the technical implementation of interfaces, dialogue systems, and gameplay mechanics. Experienced working in both 2D (pixel art) and 3D environments, contributing to full-cycle projects from creative conception to implementation using engines such as Unity, Unreal Engine, and Ren'Py.

EXPERIENCE

Game Artist / Narrative Designer / UI Programmer *01/2025 – 12/2025*

Insula Games — "Onna" · Unity (C#) · insulagames.itch.io/onna

- Created 3D art for the main character and narrative NPCs.
- Developed the complete world setting and overall game narrative.
- Produced all 2D and pixel art assets, including UI and in-game visual elements.
- Wrote dialogues and narrative texts.
- Programmed UI systems in C# (Unity), including menus, dialogue systems, and in-game interfaces.
- Implemented gameplay systems tied to UI (health, counters, states, and visual feedback).

Key Focus: Integration of narrative, art, and interface systems to deliver a cohesive and functional experience.

Narrative Designer / 3D Artist / UI Designer *01/2024 – 08/2024*

The Shining Games — "Sands of the Damned" · Unreal Engine 5 · theshininggames.itch.io/sands-of-the-damned

- Created all 3D characters and NPCs.
- Developed the game's lore, narrative, and world background.
- Wrote dialogues, character personalities, and individual backstories.
- Defined the main storyline.
- Implemented node-based dialogue systems in Unreal Engine 5.
- Designed and implemented user interfaces (UI).

Key Focus: Worldbuilding and narrative design integrated with technical systems in a 3D environment.

Narrative Designer / Pixel Artist / Programmer *01/2023 – 08/2023*

The Shining Games — "Alice: Not More" · Ren'Py (Python) · theshininggames.itch.io/alicenotmore

- Wrote the complete game script.
- Created characters, defining personalities, motivations, and goals.
- Designed the story structure and the player's narrative path.
- Programmed dialogue systems, menus, and narrative logic using Ren'Py (Python).
- Produced all pixel art assets for the game: characters, environments, UI, and interfaces.

Key Focus: Development of a strong narrative-driven experience with a consistent visual identity and branching dialogue.

EDUCATION

Video Game Design (Engineering) *Expected 12/2026*

Universidad Argentina de la Empresa (UADE) — Buenos Aires

SKILLS

- End-to-end videogame development (concept, production, and implementation).
- Implementation of gameplay mechanics and UI-driven, dialogue-integrated systems.
- Worldbuilding, narrative universe creation, and branching dialogue scriptwriting.
- Character creation (2D pixel art and 3D) with clear personalities and goals.
- UX/UI design focused on player experience and coherent visual identities.
- Artistic and technical adaptability across different game engines (Unity, Unreal, Ren'Py).
- Strong focus on atmosphere, tone, and aesthetic cohesion.
- Cross-disciplinary work between art, narrative, and programming.
- High level of autonomy in independent projects; strong organization and clear communication.
