Education

Expected in 12/2026 **Video Game Design**, **Engineering**, ***UADE***, Buenos Aires

Professional Summary

Game developer with a strong artistic and narrative focus. Comprehensive experience in character creation, worldbuilding, scriptwriting, and interactive storytelling, combined with the technical implementation of interfaces, dialogue systems, and gameplay mechanics. Experienced working in both 2D (pixel art) and 3D environments, contributing to full-cycle projects from creative conception to implementation using engines such as Unity, Unreal Engine, and Ren'Py.

Experience

01/2025 - 12/2025
Game Artist / Narrative Designer / UI Programmer
Insula Games
ONNA
Insula Games – Unity (C#)
https://insulagames.itch.io/onna
Main Role: Game Artist / Narrative Designer / UI Programmer
Responsibilities:

- Created 3D art for the main character and narrative NPCs.
- Developed the complete world setting and overall game narrative.
- Produced all 2D and pixel art assets, including UI and in-game visual elements.
- Wrote dialogues and narrative texts.
- Programmed UI systems in C# (Unity), including menus, dialogue systems, and in-game interfaces.
- Implemented gameplay systems tied to UI (health, counters, states, and visual feedback).

Key Focus: Integration of narrative, art, and interface systems to deliver a cohesive and functional experience.

01/2024 - 08/2024
Narrative Designer / Pixel Artist / Programmer
The Shining Games
Sands of the Damned
The Shining Games – Unreal Engine 5
https://theshininggames.itch.io/sands-of-the-damned
Main Role: Narrative Designer / 3D Artist / UI Designer
Responsibilities:

- Created all 3D characters and NPCs.
- Developed the game's lore, narrative, and world background.
- Wrote dialogues, character personalities, and individual backstories.
- Defined the main storyline.
- Implemented node-based dialogue systems in Unreal Engine 5.
- Designed and implemented user interfaces (UI).

Key Focus: Worldbuilding and narrative design integrated with technical systems in a 3D environment.

01/2023 - 08/2023
Narrative Designer / 3D Artist / UI Designer
The Shining Games
Alice: Not More
The Shining Games – Ren'Py (Python)
https://theshininggames.itch.io/alicenotmore
Main Role: Narrative Designer / Pixel Artist / Programmer
Responsibilities:

- Wrote the complete game script.
- Created characters, defining personalities, motivations, and goals.
- Designed the story structure and the player's narrative path.
- Programmed dialogue systems, menus, and narrative logic using Ren'Py (Python).
- Produced all pixel art assets for the game:
  Characters
  Environments
  UI and interfaces

Key Focus: Development of a strong narrative-driven experience with a consistent visual identity and branching dialogue.

Skills

- End-to-end videogame development (concept, production, and implementation).
- Implementation of gameplay mechanics and UI-driven systems.
- Worldbuilding and narrative universe creation.
- Scriptwriting and branching dialogue design.
- Artistic and technical adaptability across different game engines.
- Narrative-driven thinking applied to gameplay.
- Strong focus on atmosphere, tone, and aesthetic cohesion.
- Cross-disciplinary work between art, narrative, and programming.
- Task organization and planning.
- Clear communication of ideas and concepts.
- UI and dialogue system programming.
- Interactive narrative design and integration.
- Character creation (2D pixel art and 3D).
- UX design and implementation focused on player experience.
- Development of coherent visual identities.
- Character design with clear personalities and goals.
- Ability to translate narrative concepts into playable systems.
- High level of autonomy in independent projects.
- Technical and creative problem-solving.
- Adaptability to different project styles and production scales.
